

CORPORATE ENVIRONMENTAL POLICY

The South African Breweries as manufacturers, marketers and distributors of fine quality malt beverages and flavoured alcoholic beverages and, firmly believes that as responsible members of the community we have an obligation to manage the environmental aspects and impacts of our activities, products and services while pursuing our business aims. We are committed to sustainable development by operating in a manner that meets the needs of present and future generations.

We shall endeavour to limit the impacts on the environment and continually improve our environmental performance by fulfilling the following commitments:

- ❖ Understand, implement and align our environmental practices with those of SAB Miller
- ❖ Progressive integration of environmental management practices, appropriate to our activities, products and services, into the business planning processes, other requirements and day-to-day operations, in accordance with ISO 14001:2004 and the NOSA Integrated 5 Star System.
- ❖ Identify, monitor and minimize our significant aspects and impacts by setting achievable objectives and targets through the use of environmental management systems and appropriate business tools.
- ❖ Continue to develop and formalize our environmental data collection processes and align our risk control management practices to minimize pollution to our environment
- ❖ Comply with applicable environmental legislation, regulations and other requirements and, where appropriate, proactively seek to meet future legislative requirements in a cost-effective manner.
- ❖ Encourage the sustainable use of natural resources by promoting the re-use, reduction and recycling of materials and waste to prevent pollution.
- ❖ Take environmental concerns into consideration during changes in the Business Processes such as: Product Development, New Capital Projects and Process Changes and in the procurement of materials, goods, and services.
- ❖ Maintain transparent relations with our stakeholders regarding our environmental management performance and encourage our suppliers and contractors to follow recognized environmental management principles.
- ❖ Ensure that this policy, and its contents, are available to all stakeholders, including the general public.
- ❖ Improve environmental awareness through, training, development and education.
- ❖ Continue to develop, maintain and verify emergency plans to prevent conditions that endanger the health and safety of employees, other stakeholders and the environment.
- ❖ Periodically undertake audits of our environmental management systems in order to enhance our level of environmental performance and determine compliance to applicable legislation and other regulations in all areas of our operation.

MAURICIO LEYVA
MANAGING DIRECTOR
THE SOUTH AFRICAN BREWERIES
